

COMBATTING INSIDER THREAT

INSIDERS POSE A SERIOUS THREAT TO THE U.S. NATIONAL SECURITY. IT CONCEPTS INC. HAS DEVELOPED A SOLUTION — AN INSTITUTIONALIZED INSIDER THREAT DEFENSE (ITD) PROGRAM.

ITC's solution brings together a program that leverages counterintelligence, security, antiterrorism, and information assurance capabilities. The result is a full array of solutions to insider threats that support any organizations' strategies and facilitate improvements for detecting, deterring and mitigating insider threats. Our team, along with commercial and USG partners, works together to deliver solutions to ITD programs including:

- **Auditing and analysis of systems usage information**
- **Monitoring and analysis of physical security systems** (i.e. ingress/egress)
- **Facility security inspections to ensure compliance**
- **Developed policy regarding the use of information systems** (i.e. ban personal digital assistant from client facilities)
- **Fielded secure NetWare to:**
 - Prevent/detect/encrypt data exfiltration
 - Block/Monitor end point devices and internet use
 - Maintain even log auditing and analysis capability
- **Limited workstations capable of writing to removable media**

OUR APPROACH

It's common – every government organization focused on an ITD program that strives to choose the right technology and people for the job. We bring unparalleled solutions to meet diverse ITD implementation challenges such as integration, accessibility, security, and privacy. Our "Prepare, Respond, and Recover" methodology, backed by extensive skills and years of experience, adapts to meet customers current and long term needs.

A MULTI-DIMENSIONAL APPROACH TO INSIDER THREAT

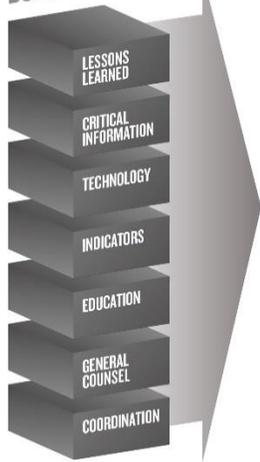

As insider threat programs come into operational practice, there is a continuing need to assess the effectiveness of tools, methods, and data sources, which enables continual process improvement. Our comprehensive approach assist organizations to prepare, respond, and recover from insider threats.

OUR SUCCESS

ITC is the preferred partner to support the Counterintelligence and Human Intelligence communities to implement insider threat countermeasures in the CI HUMINT Requirement-Reporting Operations Management Environment (CHROME). We've studied key elements of the FBI's and CIA's ITD programs to help us successfully support DIA in their efforts to benchmark the DoD ITD programs. We can identify, evaluate, and implemented technologies for CHROME that detect, deter, and mitigate insider threats from exploiting sensitive CI and HUMINT data. Simply put, we support and improve any organization's ITD program, regardless of the program's size or maturity. We have everything it takes to implement a comprehensive ITD program.

INSIDER THREAT PROGRAM BUILDING BLOCKS

ADOPTING HYBRID POLICIES AND PROCEDURES TO MITIGATING INSIDER THREATS

Successfully protecting against insider threats is a matter of corporate policy, employee awareness and readily available and enforceable controls. Additionally, a proper insider threat detection and mitigation solution will build a stronger, more secure employee network of trust.
